

DELIVERABLE OVERVIEW

Our team created three deliverables for the client. Our client requested a white paper overviewing key issues, bills, and current proposals facing broadband expansion within rural and low-income areas. The white paper would be used for policy analysts and legislatures to make more informed decisions on issues concerning broadband. The second deliverable created was an infographic showcasing rural broadband access. Its purpose is for distributive purposes amongst legislation offices, libraries, or classrooms to creatively spread awareness concerning broadband access. The third deliverable was a directory of local organizations actively fighting to increase broadband. By providing this information, WiderNet will be able to build strategic coalitions and partnerships.
